Abstract (en)

[origin: WO2016115287A1] The present application relates to an adhesive tape for conduits, conduits and methods of making conduits. In one aspect, the present application relates to an adhesive tape comprising a final tensile strength of at least about 80% of the initial tensile strength after being submitted to salt water a temperature of about 60°C for 21 days. In some embodiments, the adhesive tape comprises a final tensile strength of at least 80% the initial tensile strength after being submitted to salt water at a temperature of 90°C for 21 days. In another aspect, the present application relates to a conduit comprising enclosed conveying means and the adhesive tape adhered to the enclosed conveying means. In yet another aspect, the present application relates to a method of making an conduit comprising the steps of providing an enclosed conveying means, and adhering the adhesive tape to the enclosed conveying means.
