Abstract (en)

[origin: WO2016113425A1] The invention relates to a method for actuating a building door having a door drive. In order to make manual actuation more comfortable, the invention provides for a method for operating a door drive (14) connected to a door leaf (18) of a building door (10), comprising the step of assigning and/or carrying out different control times for different operating modes and/or different control signals.
