Abstract (en)

[origin: WO2016146295A1] The invention relates to a method for supported parking of placement vehicles (31) for a parking system (1) of a parking lot (10), having at least one parking system apparatus (2), wherein a parking region (14) of the parking lot (10) is scanned by a parking region sensor (20) of the parking system (1) and, based on the sensor information, a free and/or an occupied parking space (100) and/or a free and/or an occupied parking area (100) is identified by the parking system apparatus (2). The invention further relates to a parking system (1) for a parking lot (10) for supported parking of placement vehicles (31), wherein the parking system (1) has at least one parking system apparatus (2) having a parking region sensor (20) for identifying a parking space (100) and/or a parking area (100) of a parking region (14) of the parking lot (10).
