Abstract (en)

An aerosol spray product dispensing device is illustrated, wherein the body or cap of the dispenser is formed by molding polypropylene or other plastic materials employing a step of molding the main body, followed by a step of compressing to fix the nozzle fan -dispensing fan which belongs to the first molding in its housing on the main body and then a second molding applies the dispenser button, usually of different color and different material and/or of the same material, to obtain a finished dispenser part. The dispensing element is practically finished with no need of welding operations of any part thereof.
