Abstract (en)  
[origin: US2017325554A1] An attachment link for a watch band arranged to attach the band to a watch case between the horns, wherein a first end of the attachment link is fixed to a watch band strand and the second end of the attachment link is fixed to the case with a bar, wherein the link is between the horns and against the case. The attachment link includes a device for blocking pivoting in order to firmly hold the attachment link between the horns.
