Abstract (en)
The invention relates to a transformable furniture system adapted to be transformed from crib (2) or bed into cradle (4) and vice versa which comprises two front walls (8); a bottom (10); a basin-shaped container (18); a support structure (11; 14) which comprises a first and a second connection element (14) or a ring-shaped frame (11); connecting means and optionally two side walls (6) and/or at least a spacer element (16). The two front walls (8) of the crib version (2) or bed version represent in the cradle version (4) the side walls of the cradle between which the container is insertable or inserted. Said two front walls (8), at least one of said side walls (6), if present, and said bottom (10) are connectable or connected to each other to form a crib (2).
