Abstract (en)

[origin: EP3248896A1] The packaging (1) for the containment of objects, particularly bottles, comprises: - a main containment body (2) having: - four side walls (3) defining a housing compartment (4) and an access opening (5); - a bottom portion (9) for the support of at least a plurality of first bottles (11), formed on a portion of the housing compartment (4) opposite the access opening (5); - a first flap element (13) associated with a first edge (14) of the access opening (5) and foldable towards the bottom portion (9) for the closure of the access opening itself; - a second flap element (16) insertable within the housing compartment (4) resting on the first bottles (11) to define at least a horizontal separation plane supporting at least a plurality of second bottles (17) and substantially parallel to the bottom portion (9); - a third flap element (22) and a fourth flap element (23) associated with a third edge (24) and with a fourth edge (25) respectively of the access opening (5), the third edge (24) and the fourth edge (25) being adjacent to the first edge (14) and opposing each other; wherein the second flap element (16) comprises at least a first notch (20) and at least one of the third flap element (22) and the fourth flap element (23) is insertable within the first notch (20) to define at least a first vertical separation plane (28) of the bottles (11, 17), the first separation plane (28) being substantially transverse to the bottom portion (9).
