Abstract (en)  
[origin: RU2659758C1] FIELD: sanitation equipment.SUBSTANCE: present group of inventions relates to sanitary-engineering installations. In the first variant, the cabin, in particular, toilet cabin, comprises at least one base, at least one ceiling and several side walls. In addition, several support pillars are provided. Base is connected to ceiling and/or at least two side walls are connected to each other with at least one support post. Cab has at least three, preferably at least four, and particularly preferably four support posts. At least one support post is formed within hollow space, and wherein at least one electrically operated functional device and / or at least one component of electrically operated functional device is disposed in hollow space of this support post. In cabin of the second embodiment, at least one support post has at least one hollow space, dimensions of which allow for location of at least one electrically-operated functional device and/or at least part , at least one electrically operated functional device.EFFECT: improved design of sanitary cabins.16 cl, 4 dwg
