Abstract (en)  
[origin: ES2633514A1] The invention relates to a cooking field device (10a-b) with at least one housing unit (12a-b) and with at least one guide unit (14a-b) defining at least one guide path (16a-b) and that is provided to guide in at least the mounted state at least one cable (18a-b) inside the housing unit (12a-b) along the guide path (16a-b). In order to provide a generic cooking field device with better properties in terms of advantageous performance characteristics, it is proposed that the guide unit (14a-b) has at least one fixing element (20a-b) partially insulated or completely, which is intended to fix the cable (18a-b) partially or completely in at least the longitudinal direction of cable (22a-b).
