Abstract (en)
[origin: WO2016120458A1] The invention relates to a cover for food, in particular for hot food, the cover comprising a cover body for arranging over the food (12, 26a, 26b, 50, 66, 84) and at least one nonwoven (20, 32, 58) for absorbing steam (24) released by the food (12, 26a, 26b, 50, 66, 84), the cover body being arranged over the food (12, 26a, 26b, 50, 66, 84) and covering said food (12, 26a, 26b, 50, 66, 84). The nonwoven (20, 32, 58) is arranged on the cover body and said nonwoven (20, 32, 58) prevents condensed steam (24) that has cooled into liquid from flowing back towards the food (12, 26a, 26b, 50, 66, 84). This enables a cover with a simple design comprising at least one nonwoven (20, 32, 58) to be provided, the cover having a simple design and preventing condensate from the nonwoven (20, 32, 58) from dripping back onto the food (12, 26a, 26b, 50, 66, 84) when the nonwoven (20, 32, 58) is oversaturated.
