Abstract (en)
[origin: WO2016120902A1] The present invention relates to a magnetic assembly comprising: at least a magnetic element (1, 16, 18, 21, 28, 21', 21'', 21''') having a body (4) comprising at least a tubular portion (5, 5', 5'', 5'''), having an symmetry axis (y) and an outer radius (r5), and at least a magnetic end (6, 7) arranged on said body (4) substantially along said axis (y), at least a ferromagnetic element (2), able to be magnetically coupled to said at least one magnetic end (6, 7) of said at least a magnetic element (1, 16, 18, 21, 28, 21', 21'', 21'''), said magnetic assembly being characterized in that it further comprises at least a decorative element (3, 3'', 3''', 14, 17, 19, 27, 26, 44, 45, 52) comprising at least a first decorative portion (8, 8', 8'', 20, 47) and at least a ring or half-ring element (9, 43, 46, 53) having an symmetry axis (x) and an inner radius (r9, r48), in that said at least a first decorative portion (8, 8', 8'', 20, 47) being able to be coupled, in a fixed or removable way, to said ring or half-ring element (9, 43, 46, 53), and in that said at least a ring or half-ring element (9, 43, 46, 53) of said at least a decorative element (3, 3'', 3''', 14, 17, 19, 27, 26, 44, 45, 52) being shaped so that it can be removably inserted on said at least a tubular portion (5, 5', 5'', 5''') of said body (4) of said at least a magnetic element (1, 16, 18, 21, 28, 21', 21'', 21''') so that the symmetry axis (x) of said at least a ring or half-ring element (9, 43, 46, 53) corresponds with said axis (y) of said tubular portion (5, 5', 5'', 5''').
