Abstract (en)

[origin: CA3026000A1] The invention proposes a decorative object, such as a jewellery item, comprising a body and a decorative element reversibly attached to the body in such a way that the decorative element can easily be changed. According to the invention, the decorative object comprises a reversible attachment system for attaching the decorative element to the body, comprising: On the decorative element (200): o A first locking stud (210) onto which a rigid rod (211) is pivotably mounted; o A second locking stud (220) provided with a reversible locking means (221) for locking the rod (211) in the attachment position; On the body: o A first locking opening intended to receive the first locking stud (210) of the decorative element; o A second locking opening intended to receive the second locking stud (220) of the decorative element; A bearing surface (230) being arranged, in the attachment position, between the two locking studs (210/220), and on which the rod (211) is intended to bear with force when it is locked in the attachment position by the reversible attachment means (221) of the second locking stud (220).
