Abstract (en)

A toilet water tank includes a sealed pressure cylinder barrel (54), a piston (55), a piston rod (56) that penetrates through one end of the cylinder barrel (54), a first water inlet pipe (52), a second water inlet pipe (50), and a water outlet pipe (40), where the first water inlet pipe (52) and the second water inlet pipe (50) are located at two sides of the cylinder barrel piston and are both in communication with a pressurized water inlet main channel (53); the first water inlet pipe (52) is also a cylinder barrel water outlet pipe, and water inlet and outlet functions are alternatively applied; and a pressure valve is provided on each of the second water inlet pipe (50) and the water outlet pipe (40). Further provided is a toilet pipe pressure valve. The toilet water tank in this application has a simple structure.
