Abstract (en)  
[origin: EP3252301A1] A fuel injector (16) for a common rail fuel system (12) is disclosed. The fuel injector (16) comprises a nozzle body (36) extending along a central longitudinal axis (A), and including a central bore (34) having a first cylindrical sealing face (74). The fuel injector (16) further comprises at least one first injection hole (60) extending from a first inlet (64) being spaced apart from the first cylindrical sealing face (74). The fuel injector (16) further comprises at least one second injection hole (62) extending from a second inlet (68) being spaced apart from the first cylindrical sealing face (74). The fuel injector (16) is particularly suitable for use in a dual fuel internal combustion engine.
