Abstract (en)
[origin: EP3252376A1] A combustion head (100) characterized in that it comprises the following elements: - a fire tube (10) with a substantially cylindrical shape and having a central symmetry axis (X) and holes (11) for the recirculation of the combustion products; - a flame disc (20), which is arranged perpendicularly to the central symmetry axis (X); - a conical diffuser (30) with a double conical inclination; - a nozzle (41), which is designed to atomize liquid fuel; and - a pair of electrodes (50) for lighting the flame.
