Abstract (en)  
[origin: WO2016123642A1] Disclosed is a drink tasting utensil (1), in particular a wine tasting utensil, comprising a receiving area (3) for receiving liquid, which receiving area is surrounded by a bag part (2), and a feed channel (4) that leads into the receiving area (3) for introducing liquid into the receiving area (3), wherein a section of the feed channel (4) that away from the receiving area (3) is formed by a mouthpiece (5). In order to prevent a return flow of liquid from the receiving area (3), the feed channel (4) can be closed by means of a self-closing valve (6) after the liquid has been introduced into the receiving area (3), which valve has at least one reversibly deformable film part (8), by means of which the feed channel (4) can be closed. The drink tasting utensil has a venting device (10) to enable gas to escape from the receiving area (3). The drink tasting utensil further has a fastening device (13) for fastening to the body or to an article of clothing of the user.
