Abstract (en)

[origin: WO2016124250A1] The invention relates to a platform device, comprising at least one floatable platform (12) which is provided to support at least one energy generation unit (14) at least partially above a water level (16). It is proposed that the at least one floatable platform (12) comprises a plurality of pipes (18) for providing buoyancy as well as a support structure (20) which is fastened on the pipes (18).
