Abstract (en)
[origin: WO2016124442A1] The present invention relates to an underwater vessel (1) having a waste-gas outlet (14) and having a crew compartment (5) for accommodating crew members, wherein the crew compartment (5) has an opening (4), through which waste gases can penetrate into the crew compartment (5), wherein, for the purpose of protecting the crew members against the effect of waste gases penetrating into the crew compartment (5), the underwater vessel has an extraction device (7), via which waste gases can be extracted from the crew compartment, wherein the extraction device (7) is designed in the form of a jet pump.
