Abstract (en)

[origin: WO2016124641A1] The invention relates to a gas distributor device (100) for an atmospheric gas burner, which comprises a distributor housing (110) having a gas supply connection (180) and at least one injector (150) which is formed in a front wall (120) of the distributor housing (110) and is connected via a gas feed channel (170) to the gas supply connection (180). In this case the injector (150) is shaped in the form of a coaxial injector having a central air outlet opening (151) and a coaxial gas outlet opening (152) surrounding the central air outlet opening (151).
