Abstract (en)

[origin: EP3254579A1] A sport shoe (100), in particular for cycling, comprising first lacing strip (101), a second lacing strip (102), an intermediate strip (103) and a closing device (10), which comprises a first winder (1) and a second winder (2) for stressing the first lacing strip and the second lacing strip so as to bring them closer together, and actuation means (3) for selectively rotating the first winder or the second winder. The first winder (1), the second winder (2) and the actuation means (3) are rotatably supported on a single support unit (4). The shoe further comprises plug-in means (6) of the support unit on the intermediate strip.
