Abstract (en)

[origin: EP3254774A1] Guide assembly comprising a support frame (12) and a guide unit (11) installed cantilevered on said support frame (12) and configured to guide the introduction and/or discharge of a metal product, into or from a rolling unit (41). Between the guide unit (11) and the support frame (12) one detection device (25) is installed, configured to detect a flexion of the guide unit (11) with respect to the support frame (12).
