Abstract (en)
[origin: CN107419379A] A draw frame (1) for textile fiber strips has a drafting system (10) and a base plate (12) which are received on a coil case (11) and on which the at least one coil Cartridge (13). The lap tube (11) is arranged on the base plate (12) at intervals by means of struts (14). The draw frame (1) is designed in such a way that at least one coiled drum (13) with a diameter of 1200 mm can be received on the base plate (12) and can be filled with textile fiber strands. Both the coil housing (11) and the base plate (12) are configured as multiple pieces. The coil housing (11) and / or the base plate (12) are each reinforced in such a way that the strip draw frame (1) can be transported in a mounted state. The draw frame (100) is provided with a first drawer device (1) and a second draw frame(1) respectively constructed as described above.
