Abstract (en)

[origin: WO2016128305A1] A value or security product (100) is created for the decentralised individualisation of value or security products (100) with a multi-coloured individualising security characteristic (200) that is secured against tampering. The value or security product (100) is formed by a product body (150) having two outer sides (125). Same has at least one non-individualising security print (128) as well as the at least one individualising security characteristic (200). The at least one non-individualising security print (128) and the at least one individualising security characteristic (200) are printed overlapping one another at least on one of the outer sides (125) of the product body (150) in the same printing plane (126).
