Abstract (en)

[origin: WO2016128285A1] A fitting for at least one sliding door (3, 4), in particular for furniture, comprises a guide rail (10) which can be fastened on a carcass via at least one holder (6), wherein the holder (6) and the guide rail (10) can be brought positively into engagement at least in certain regions, and a stop element (9) is fastened directly or indirectly on the guide rail (10) and secures the guide rail (10) in the direction of movement (Y) of the leaf (3, 4). Furthermore, a movable securing element (7) can be guided on the holder (6), which securing element can be moved from a mounting position into a securing position and secures the guide rail (10) on the holder (6) in the securing position. As a result, the guide rail (10) can be mounted straightforwardly on the carcass in a stable manner.
