Abstract (en)
[origin: WO2016128520A1] Electromagnetic induction device (1) comprising a closed magnetic circuit (2), without an air gap, at least one first part (11) of which is substantially rectilinear and surrounded by a sleeve (3), said sleeve (3) being surrounded by an electrical conductor (4) which comprises at least one electrically insulated metal sheet on at least one of the faces thereof, characterised in that at least said or each said first part (11) of said magnetic circuit (2) has a circular cross-section.
