Abstract (en)

The present invention relates to a height-adjustable table comprising a table top comprising a first table face and a second table face, and at least a first leg assembly having a first leg end and a second leg end, the first leg assembly comprising a first leg member and a second leg member relatively movable in relation to each other along a longitudinal axis. The second table face comprises at least a first recess arranged to receive a first guide rail where the first leg end of the leg assembly is connected with the guide rail.
