Abstract (en)  
[origin: CN107419382A] A drawing device (1) for textile fiber slivers includes a drafting system (10) which is accommodated in a storage housing (11), and at least one lateral cover (12) which is arranged on the storage housing (11) and adjacent to drafting system (10). The lateral cover (12) is accommodated above storage housing (11) in an upward turning manner by means of a hinged arrangement (13). A longitudinal adapter member (14) is accommodated on the storage housing (11). The lateral cover (12) is pivotably accommodated on the longitudinal adapter member (14) by means of the hinged arrangement (13), and the hinged arrangement (13) is arranged on a front side (15) of the longitudinal adapter member (14). A back side opposite to a front side (15), of the longitudinal adapter member (14) is sealed by a trailing edge (17) of the storage housing (11). A drawing frame (100) comprises a first drawing device (1) and a second drawing device (1) which are arranged according to the aforementioned manner correspondingly.
