Abstract (en)

[origin: CN107130499A] A ground compacting machine, especially a sinle-grind compacting machine (1), includes a machine frame (2) supporting a machine body. At least one ballast weight block which adapts the machine body (4) is fixed on the machine frame (2). The invention also provides an anti-collision part (8), which at least partly includes a part of the machine body (4), of the ballast weight block (6).
