Abstract (en)
[origin: EP3258226A1] A combination weighing apparatus 1 includes a distributing unit 2 that distributes articles supplied from above, a plurality of radiation units 3 that conveys the articles distributed from the distributing unit 2, a plurality of detection sensors 72 disposed above the radiation units 3 to detect the articles conveyed by the radiation units 3, a plurality of weighing units 5 disposed below the radiation units 3 on a downstream side in an article conveying direction to accumulate and weigh the articles, a controller 9 that controls the distributing unit 2 or the radiation units 3 based on detection by the detection sensors 72, and a sensor cover 71 that incorporates the plurality of detection sensors 72, and the sensor cover 71 is disposed at a different position from an end portion of each of the radiation units 3 on the downstream side when viewed in a vertical direction.
