Abstract (en)
[origin: WO2016132104A1] A dispenser for spraying fluid onto a human or animal body part comprises a hoop, C-shaped or U-shaped structure, a plurality of apertures from which a fluid is sprayed onto a body part place within the structure. The fluid connection between the container for the fluid and the apertures ensures that the flow rate of the fluid from one aperture is substantially the same as that from another aperture.
