Abstract (en)
[origin: WO2016131935A1] The invention relates to a system (1) for controlling stimulation impulses, comprising at least one control unit (4) and one item of clothing (10) having a plurality of electrodes (8, 20) for electro-stimulation. The control unit (4) is configured to carry out electro-stimulation with defined parameters at different electrodes and, during a training session, different parameters can be produced at different electrodes by means of said control unit (4).
