Abstract (en)
[origin: WO2016131525A1] The invention relates to a method for producing a composite body (1) comprising a support body (2) and at least one decorative element (3), preferably a jewel (3a, 3b), the support body comprising (2) a thermoplastic material. The method is characterised by the steps: • arrangement of the decorative element (3) on the support body (2), • heating of the support body (2), • pressing of the decorative element (3) into the support body (2) using a stamp (4) consisting of an elastically deformable material, the material of the stamp (4) being selected from the group of elastomers.
