Abstract (en)  
[origin: WO2016131610A1] The invention relates to a food-accommodating container (13, 14, 15, 16, 17) for a domestic refrigeration appliance (1), said container being of tray-like design and having a lateral wall (18) with a first planar wall (20) and at least a second planar wall (21), which is arranged at an angle to the first wall, wherein the walls (20, 21) open out at a curved transition (22) of the lateral wall (18), said transition connecting the walls (20, 21), and a decorative film (23) is formed in certain regions of the lateral wall (18), wherein the decorative film (23) is formed in one piece over the transition (22) and in certain regions of the first wall (20) and in certain regions of the second wall (21), wherein a lower edge (24) of the decorative film (23), said lower edge being directed away from an upper periphery (19) of the food-accommodating container (13 to 17), is arranged along a stepless surface-area region of the transition (22), along a stepless surface-area region of the first wall (20) and along a stepless surface-area region of the second wall (21). The invention also relates to a domestic refrigeration appliance (1).
