Abstract (en)

[origin: WO2016131517A1] The invention relates to an antenna module (101) for a vehicle. The lower assembly (103) comprises a locking means (114) and the upper assembly (102) comprises a counter locking means (115), said locking means (114) being able to be locked to or unlocked from the counter locking means (115), and the locking means (114) being able to be actuated so as to avoid, when actuating same, exerting a force that acts in a joining direction (FR).
