Abstract (en)
Assemblable case for containing objects, comprising at least one continuous, flexible, flat element (10;110) suitable for forming a base (10), a rear wall (10b) and a front flap for closing/opening the assembled case, which are situated opposite each other in a transverse widthwise direction of the assembled case, the case comprising at least one pair of rigid elements (20;120;220;320) which are independent of the flat element (10;110), are suitably shaped and are designed to form the opposite flanks in the longitudinal lengthwise direction (X-X) of the formed case, and relative joining means (30;130) for ensuring a stable, but reversible connection between the flexible flat element (10;110) and the rigid elements (120;220;320) for assembly/disassembly of the case, and the flat element forming moreover a front contact rim for the closing/opening flap of the assembled case.
