Abstract (en)  
Security gear (14) to be worn to be secured from falling off a platform (12), comprising: - a harness (16); - a lanyard (18) having a first end and (19) a second end (21), the first end (19) being attached to the harness (16) and the second end (21) having a fastening device (22) for fastening the security gear (14) to the platform; - a harness connection signalling device (20) for signalling a secure connection of the harness (16) to the platform, said signalling device (20) being a plugin cable having an end (25) with a plug (24), the plug fitting into a socket (30) in the platform, the cable also having an end (23) attached to the harness; wherein the plug (24) has a trigger element (48) to trigger a harness connection sensor arranged in said socket (30) when the plug (29) is plugged in, thus signalling a secure connection of the harness (16) to the platform (12).
