Abstract (en)

[origin: EP3260260A1] Compacting device for pressing ceramic articles, usable in a pressing device provided with a conveyor belt (T) that is movable along a main direction (X) for the forward movement of a load (S) of incoherent ceramic material, comprising a first leveler (2), which is structured to come into contact with two lateral zones of the load (S) and to push such lateral zones towards one another, perpendicular to the main direction (X).
