Abstract (en)
[origin: EP3260362A1] The present invention relates to a control switching method, a control terminal, a computer program and a recording medium, which enable control of a controlled device to be switched. The control switching method comprises: sending (S11) a request for controlling the controlled device to a server, wherein the server, after receiving the request, requests a first control terminal, which controls the controlled device at present, to transfer control; receiving (S12) a notification, sent by the server, of authorizing to control the controlled device, wherein the notification is sent after the server determines that the first control terminal agrees to transfer control; and connecting (S13) communicatively with the controlled device to control the controlled device.
