Abstract (en)
[origin: EP3260639A1] A mobile panel system (1) comprising an upper guide (2) and at least one panel (3) operatively connected to slide along it and to rotate once it reaches a predefined rotational position. The system (1) has a centerline plane (M) having a vertical extension that defines a first side (M1) and a second side (M2). The system (1) comprises a first trolley device (51) which supports the panel (3) in sliding and rotation on the upper rail (2) comprising two pairs of support and slide wheels (510) comprised of a first vertical pair of wheels (511) positioned on the first side (M1) and a pair of horizontal wheels (512) positioned on the second side (M2). The system (1) comprises a second trolley device (52) which supports the panel (3) in sliding and comprises a pair of vertical sliding and support wheels (520) positioned on the second side (M2).
