Abstract (en)
[origin: CN205806033U] The utility model relates to a fixed beam for fan mesh enclosure, the fixed beam has an at least first branch of extending on vertical, the design of first branch is for striding across a plurality of grids of fan mesh enclosure, wherein, an at least first branch has free vertical end, and an at least first branch in the region of vertical end of freedom, on perpendicular to longitudinal extension horizontal, the fixed component that founds cubic form or long cubic form laterally material is fixed with cooperating in the at least first branch. Through the utility model discloses a fixed beam, guarantee fan mesh enclosure is stable just to be connected on fan or fan motor low -costly.
