Abstract (en)
A method and apparatus are disclosed for utilizing UE beamforming in a wireless communication system. Preferably, the method includes the UE performing measurement to obtain a measurement result associated with a cell (1905). The method also includes the UE determining whether to use the UE beamforming in the cell at least based on the measurement result, wherein the UE uses the UE beamforming in the cell if the measurement result is worse than a first threshold (1910).
