Abstract (en)

[origin: WO2016134965A1] The invention discloses a fluid distributor (11) for a preparation device (10) for preparing surgical instruments (12), in particular endoscopes, comprising a first fluid transfer body (13), which has a fluid bore (15, 16) comprising a first inlet (17) and a first outlet (18), and comprising a second fluid transfer body (14), which has at least two second fluid bores (20, 23), each comprising a second inlet (24) and a second outlet (25), wherein the first fluid transfer body (13) and the second fluid transfer body (14) can be rotated with respect to one another around an axis of rotation (27) in such a way that the first fluid bore (15, 16) fluidically communicates with the at least two second fluid bores (20, 23) one after the other.
