Abstract (en)

[origin: WO2016135323A1] A fairing intended for fairing an elongate object intended to be at least partially submerged, the fairing comprising a plurality of fairing sections (12), each fairing section (12) comprising a plurality of fairing elements (13), the fairing elements comprising a channel intended to receive the elongate object and being profiled in such a way as to reduce the hydrodynamic drag of the elongate object that is at least partially submerged, said fairing elements (13) being intended to be mounted pivoting on the elongate element about the longitudinal axis of the channel, said fairing elements (13) being linked together along the axis of the channel and being hinged to each other, the fairing sections (12) being free in rotation around the channel relative to each other.
