Abstract (en)
[origin: WO2016134902A1] The invention relates to a weapon ejection device 10,12,14, 16, which comprises at least one endless conveying element 20 and at least a first deflection element 30 and at least a second deflection element 40, wherein the at least one first deflection element 30 and the at least one second deflection element (40) serve to deflect the at least one endless conveying element 20. The at least one endless conveyor element 20 has at least one first weapon driving element 50, wherein a weapon 60 can be ejected by a half turn of the at least one endless conveying element 20 by the at least one first weapon driving element 50.
