Abstract (en)
[origin: WO2016135230A1] The invention relates to a high-voltage cable set (2), in particular for a vehicle electrical system, comprising a plurality of cables (4), which are surrounded by a common shield (6), and a connector (10), which consists of a conducting material and is electrically connected to the shield (6). For this purpose, a contact sleeve (16) is integrated into the connector (10), the shield (6) being fastened to said contact sleeve. The risk of contact corrosion is thereby significantly reduced.
