Abstract (en)

[origin: EP3062482A1] The invention provides a method and system for wireless high speed data pick up with a portable device from a caching device; a method and system for data download from a content adaptation and delivery platform to a caching device; a method and system for data composition by a content composition platform based on a user order with a content broker or a content composition platform; and a method and system for content data ordering by a user at a content broker or composition platform or a combination thereof. In addition, it is provided a caching device for providing of content data to be picked up by a portable device through a high-speed wireless connection. The described methods and systems can be combined to an overall method and/or system for end-to-end delivery from a content provider to a portable user device.
