Abstract (en)

[origin: CN107536106A] The invention provides a put-in device (10), which is configured to put rod-shaped articles (11, 11') of the tobacco processing industry into strips (12) of the tobacco processing industry or attach the same to the strips (12) of the tobacco processing industry. The put-in device (10) comprises a plurality of pods (16, 17) each comprises at least one accommodating area (14) used for the rod-shapedarticles (11, 11') of the tobacco processing industry, wherein the at least one accommodating area (14) comprises a longitudinal extension part. The invention also relates to a corresponding application and a method for operating a strip former (21) in the tobacco processing industry. The put-in device (10) in the invention is characterized in that the pods (16, 17) have bodies (26, 27) and the bodies portions (24, 24') at the rear backs are configured in such a manner that the bodies portions at the rear backs enter or can enter accommodating areas (14) for the rod-shaped articles (11, 11')of the followed pods (17).
