Abstract (en)
A printing apparatus includes a holding unit holding a bag with a storage portion that is pliable and in which ink used for printing is stored, and a discharge port through which the ink is discharged; and an agitating unit configured to agitate the ink. In the printing apparatus, the holding unit is configured to incline the storage portion with respect to a horizontal direction, and hold the bag in a posture where the discharge port is disposed below the storage portion in an inclination direction; and the agitating unit includes a pressing member configured to press the storage portion in the posture from a lower side toward an upper side in the inclination direction and deform the storage portion.
