Abstract (en)

[origin: WO2016139269A1] The invention relates to a method for acquiring an orthodontic status or for determining the need for an orthodontic treatment, comprising the steps of providing a device for acquiring geometric data of the upper and/or lower dental arches of the patient and/or of the jaw position, or of a section of the above; acquiring geometric data of the upper and/or lower dental arches and/or of the jaw position of the patient, of a section or of an impression (11) or of a model of the above or of a bite registration; and evaluating the acquired geometric data of the dental arch and/or of the jaw position. The invention further relates to devices for performing the method.
