Abstract (en)  
[origin: WO2016141951A1] The invention relates to a spraying apparatus comprising a housing (2) including a liquid channel (3), a liquid inlet (4) for providing liquid to the liquid channel (3) and a liquid outlet (5) comprising a liquid dispensing element (6) with multiple outlet openings (6.1), wherein the spraying apparatus further comprises a nozzle (7) arranged within said liquid channel (3) and at least one deflecting unit (8), wherein the position of the nozzle (7) with respect to the deflecting unit (8) or the position of the deflecting unit (8) with respect to the nozzle (7) is variable in order to change the liquid distribution across the liquid dispensing element (6).
